NO. OF ENCLS. 1 (LISTED BELOW)
SUPPLEMENT TO REPORT NO. 50X1-HUM

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT OF 1917, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION
50X1-HUM

1. The principles applied in the Czechoslovakian Aircraft Warning Service were recently remodelled after the Soviet pattern. 50X1-HUM

2. An air guard observer with a radio set is posted about 1-2 km behind the front line. Three such observers are assigned to a signal officer equipped with a radio set connected by telephone to a DF station. The DF station is connected by radio and telephone with the operations headquarters, which likewise is connected with the air force headquarters. The same kind of connection exists between this headquarters and the army headquarters and individual airfields. The operations headquarters also maintains radio and telephone connections with the radar stations.

3. The air force headquarters is divided into the evaluation section and the command section proper. The evaluation section receives its information from the operations section and transmits it to the command section as a basis for its operational orders. All the air guard observers, signal officers, DF and radar stations are assigned to the operations section.

4. The improvised airfields of the fighter aircraft are located closest to the front line, then follow the fields occupied by reconnaissance aircraft and light bombers. The airfields of the heavy bombers are in the rear zone. Each of the fields is equipped with at least a radio station and a radar set. Dummy airfields are to be set up side with operated fields in the ratio of 1:1, by side
